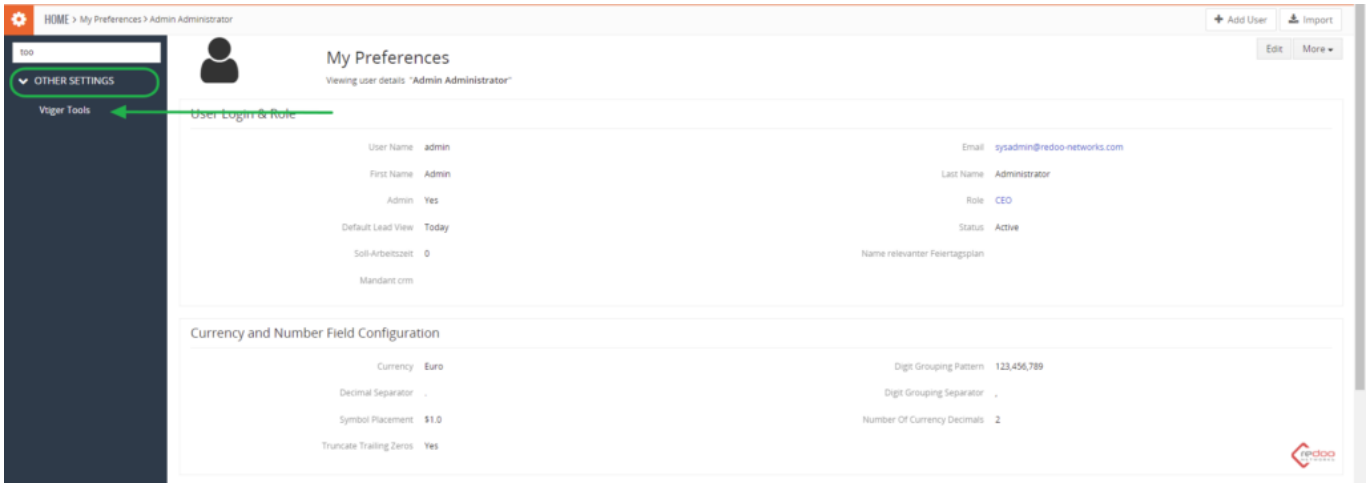
From the Settings page you can access the Vtiger Tool page



Vtiger Tool is a special settings page for admin use only

The Tool is divided in four blocks:

- General Settings
- Partial DataView
- Block migration
- Check File reopository

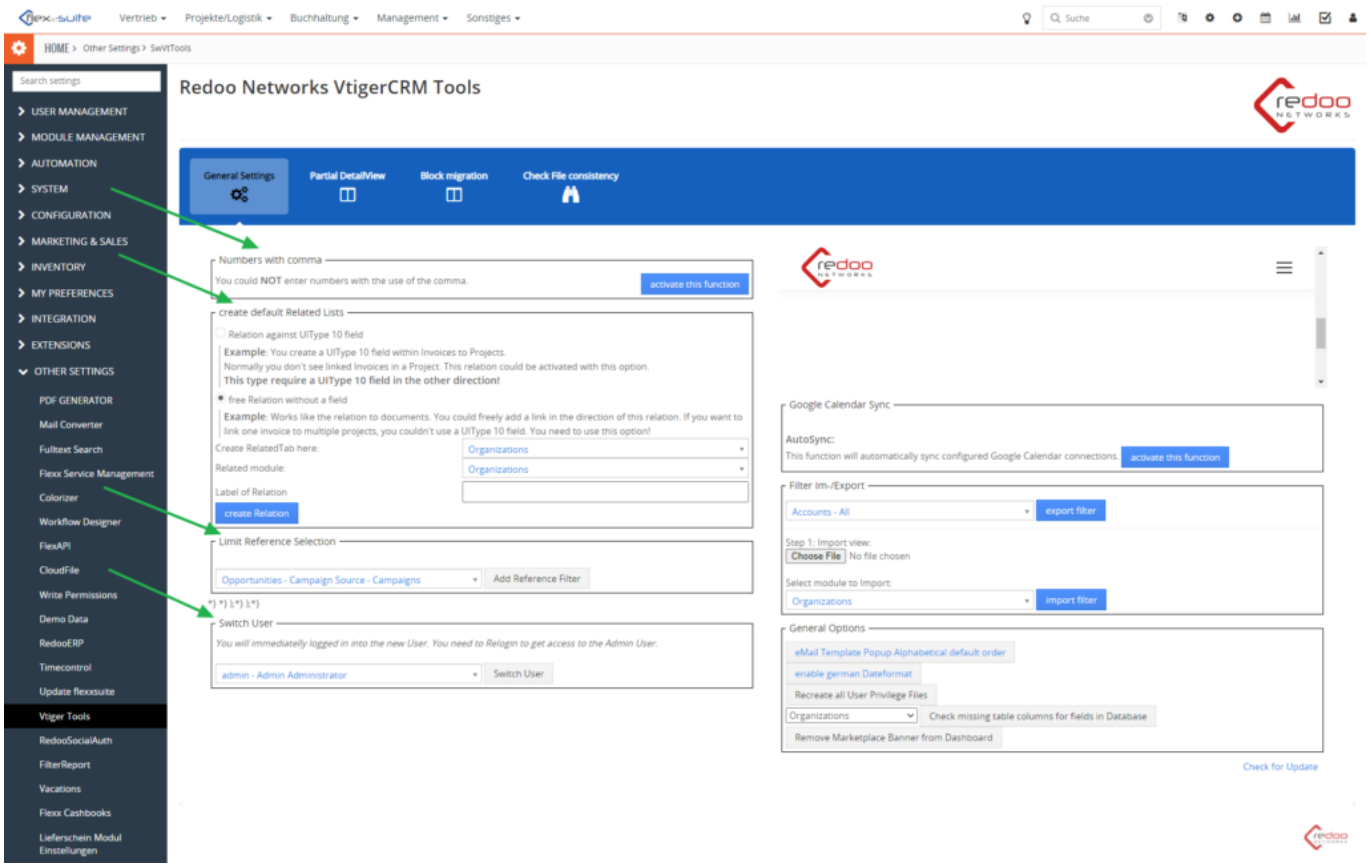
General Settings

Copyright © 2026 Redoo Networks GmbH



- **Numbers with coma** – here you can activate a possibility to use number values with coma instead of dot
- **create default Related Lists** – Here you can set a relation against UIType 10 field or set a free Relation without a field
- **Limit Reference Selection** – A tool to add an additional reference selection within specific module fields
- **Switch User** – A special tool which can be used by admin to log in as any user registered in the CRM without password.

Second column brings some more features:

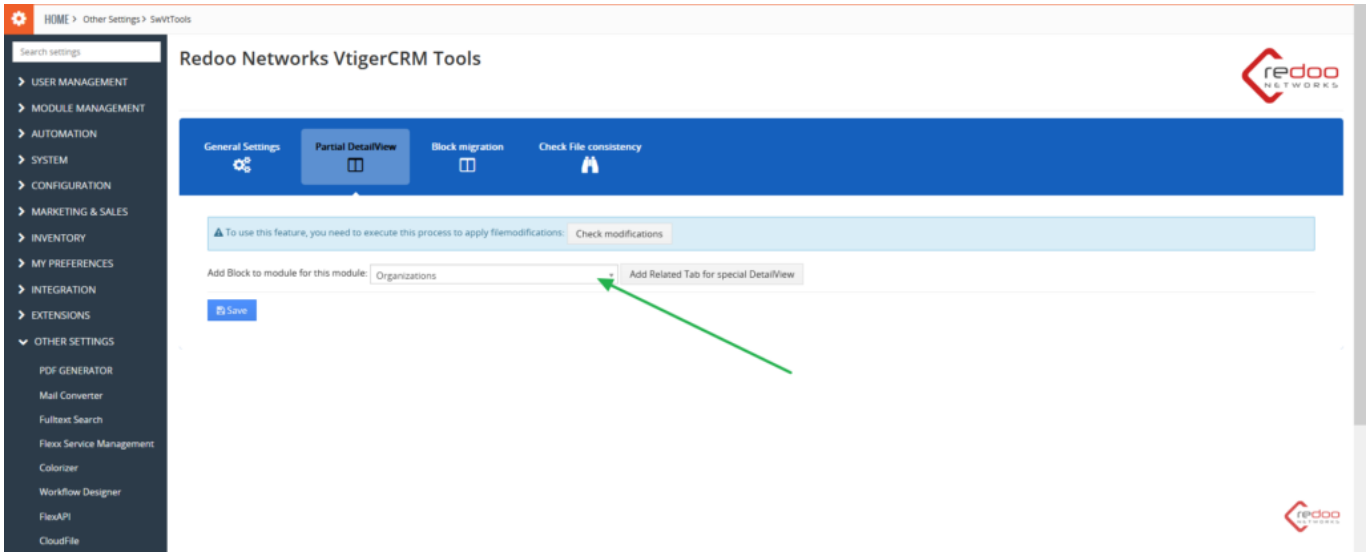
- **Google Calendar Sync** – This function will automatically sync configured Google Calendar connections
- **Filter Im-/Export** – Here you can import or export a filter for a specific module
- **General Options** – this block is used for some more specific options

Partial DataView

Here you can create a related tab block for any module of the CRM

 Copyright © 2026 Redoo Networks GmbH

Select a module in the list here



In the block appeared you customize the type of a tab and its filling

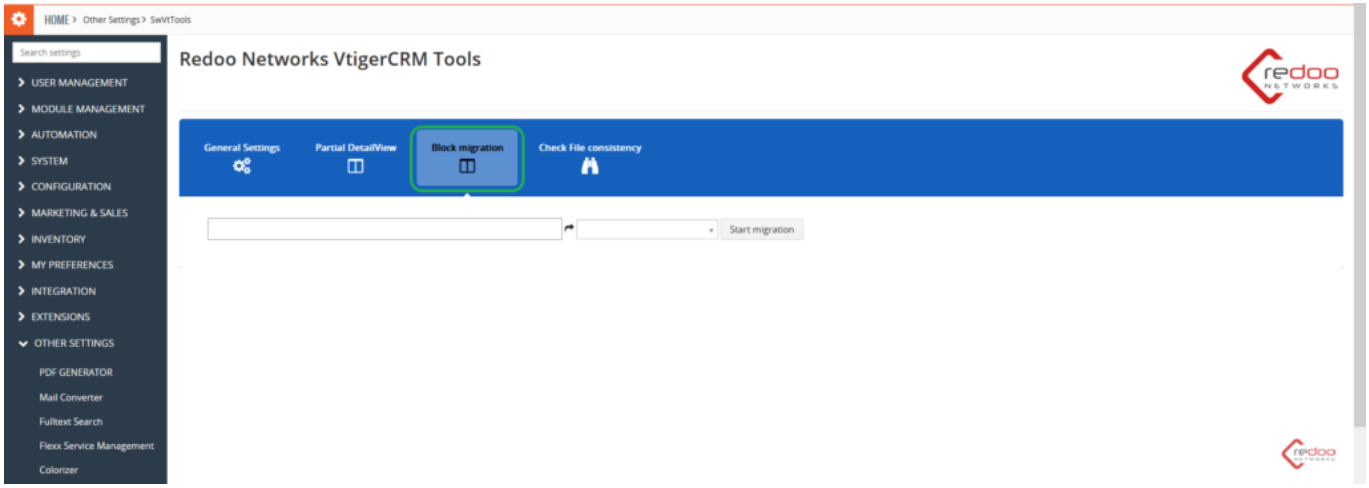
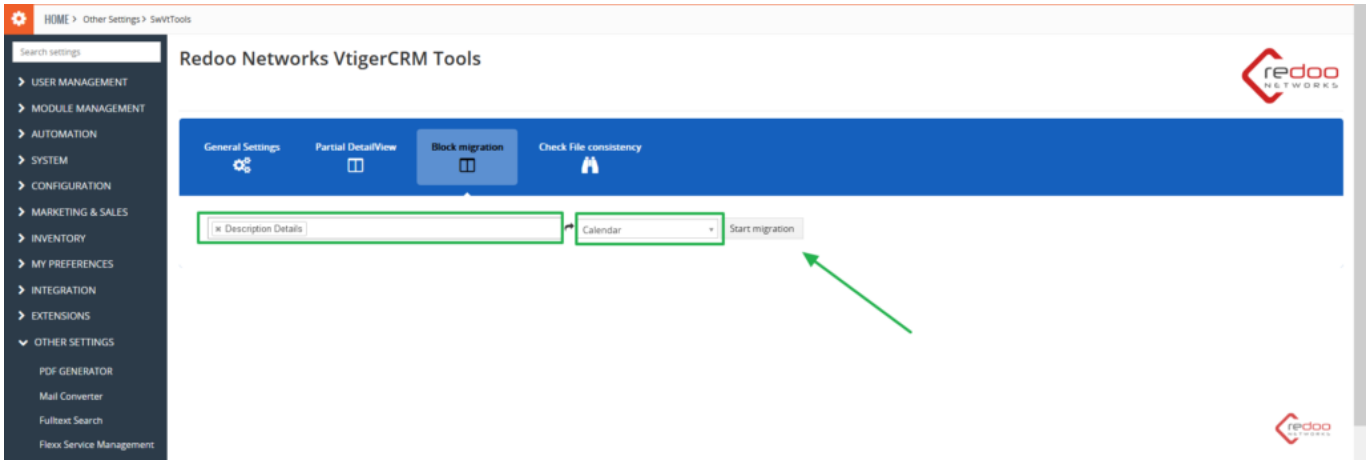
Block migration

In Block migration you can make a migration between two blocks



To do that firstly select a block and a Module where you can perform a migration and then press “Start migration” button



In **Check File consistency** you can check if the all internal files are present in the CRM and if not find a cause of the problem you are struggling with
