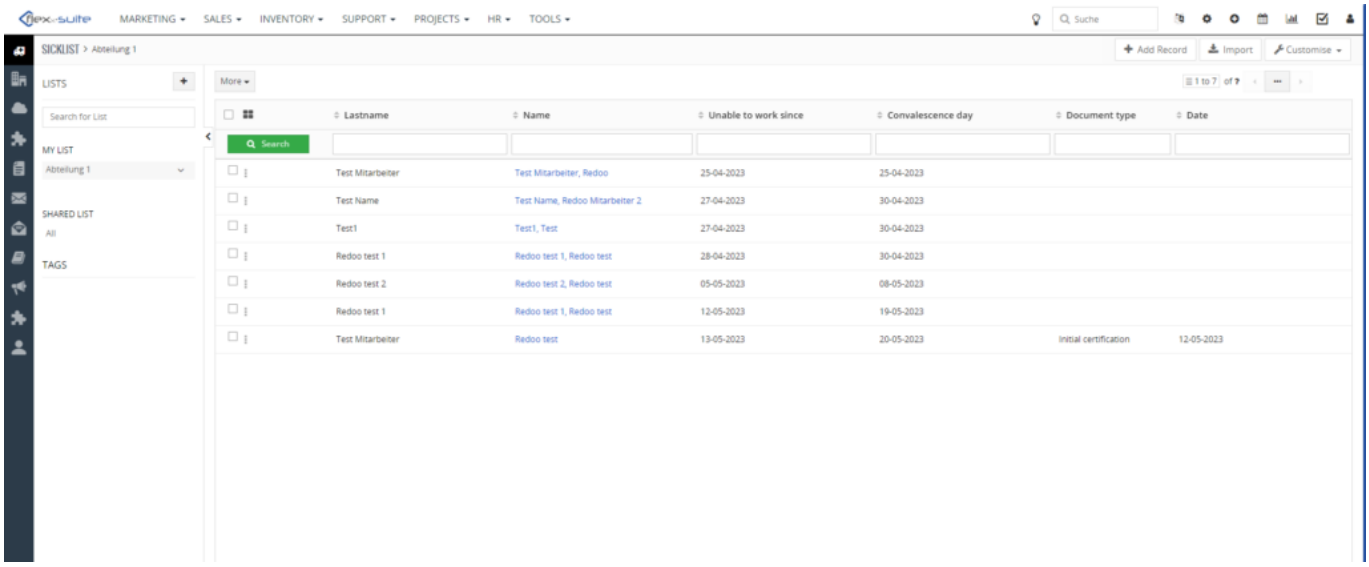
By default, each employee sees only his or her sick bills.
The supervisor and the company's HR manager can view the sickness certificates of all the employees under their control. To do this, go to the "Sicklist" module, where all entries are listed:



The sickness certificates cannot be deleted by the system.

When a new Sicklist is created for an employee, their supervisor receives an email with a link to their sick bill.

The person responsible in the company can also have an overview of the sick days created in the personnel report...:
