

Flexx.Suite

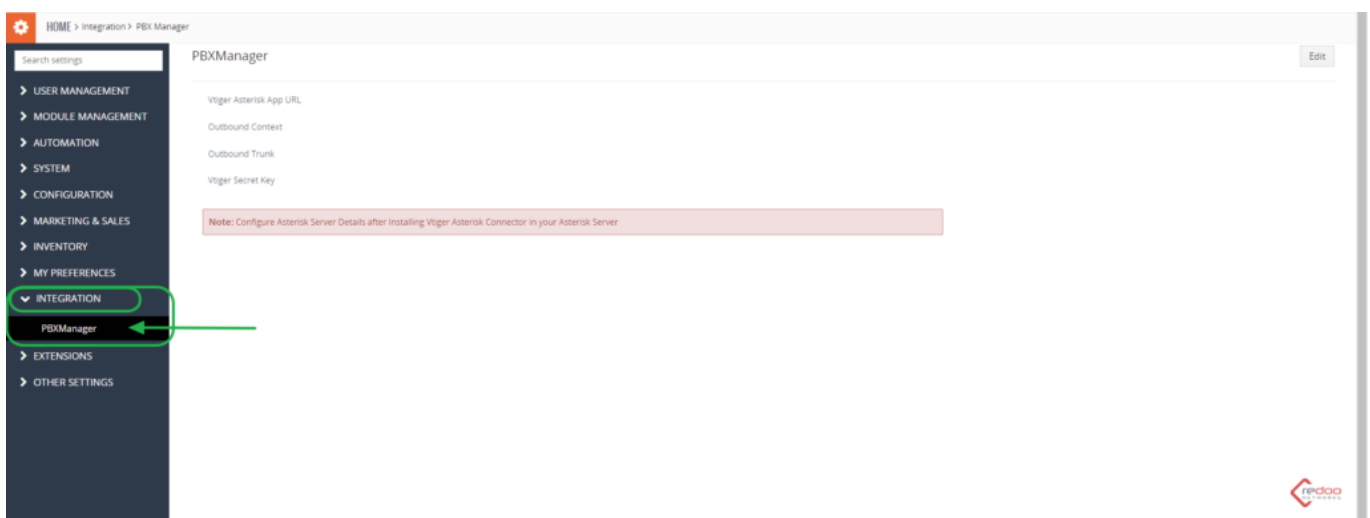

16.Integration

This particular section is used to set up a PBX connection

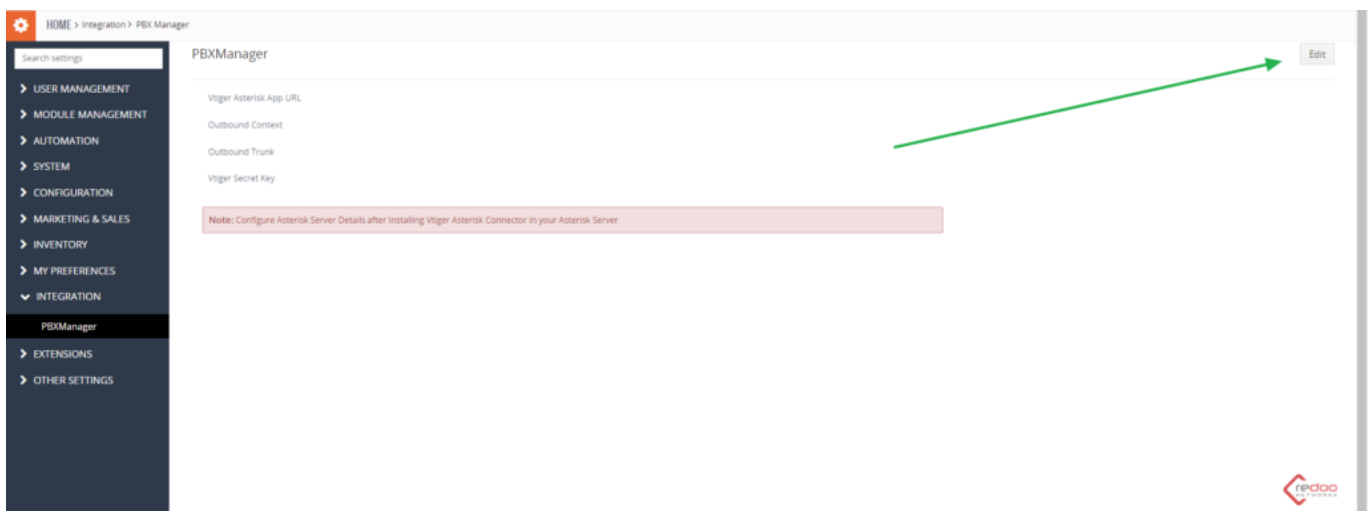

PBXManager

On this page you can see the already set connection.

Now it is empty as the connection has not been set yet

To set up the connection press the “Edit” button like shown in the image

On the opened page you will see a form you need to fill in with:

- Vtiger Asterisk App URL
- Outbound Context
- Outbound Trunk

Vtiger Secret Key is set automatically by default but you still can change it

HOME > Integration > PBX Manager

Search settings

PBXManager

Vtiger Asterisk App URL *

Outbound Context *

Outbound Trunk *

Vtiger Secret Key *

152202571620fe566d37aa

Note: Configure your Asterisk App URL in the format
(protocol)://asterisk_ip/(VtigerConnector_port) ex:http://0.0.0.0:5000
