

Flexx.Suite

17.Vtiger Tools

From the Settings page you can access the Vtiger Tool page

Vtiger Tool is a special settings page for admin use only

The Tool is divided in four blocks:

- General Settings
- Partial DataView
- Block migration
- Check File repository

The screenshot displays the 'Redoo Networks VtigerCRM Tools' interface. At the top, there is a navigation bar with 'HOME > Other Settings > VtigerTools' and a search bar. A sidebar on the left lists various settings categories, with 'Vtiger Tools' selected. The main content area features a blue header with four tabs: 'General Settings' (highlighted with a green box), 'Partial DetailView', 'Block migration', and 'Check File consistency'. Below the tabs, the 'General Settings' section is active, showing several configuration options: 'Numbers with comma' (with an 'activate this function' button), 'create default Related Lists' (with a 'create Relation' button), 'Limit Reference Selection' (with an 'Add Reference Filter' button), and 'Switch User' (with a 'Switch User' button). On the right side, there are sections for 'Google Calendar Sync', 'AutoSync' (with an 'activate this function' button), 'Filter lim-/Export' (with an 'export filter' button), and 'General Options' (with a 'Check for Update' button). The footer contains technical information: 'Powered by flexx.suite 2021-12-29-daily - changelog | Generation: 609 ms | Transfer: 557 ms | DOM: 4 ms | Complete Time: 6545 ms'.

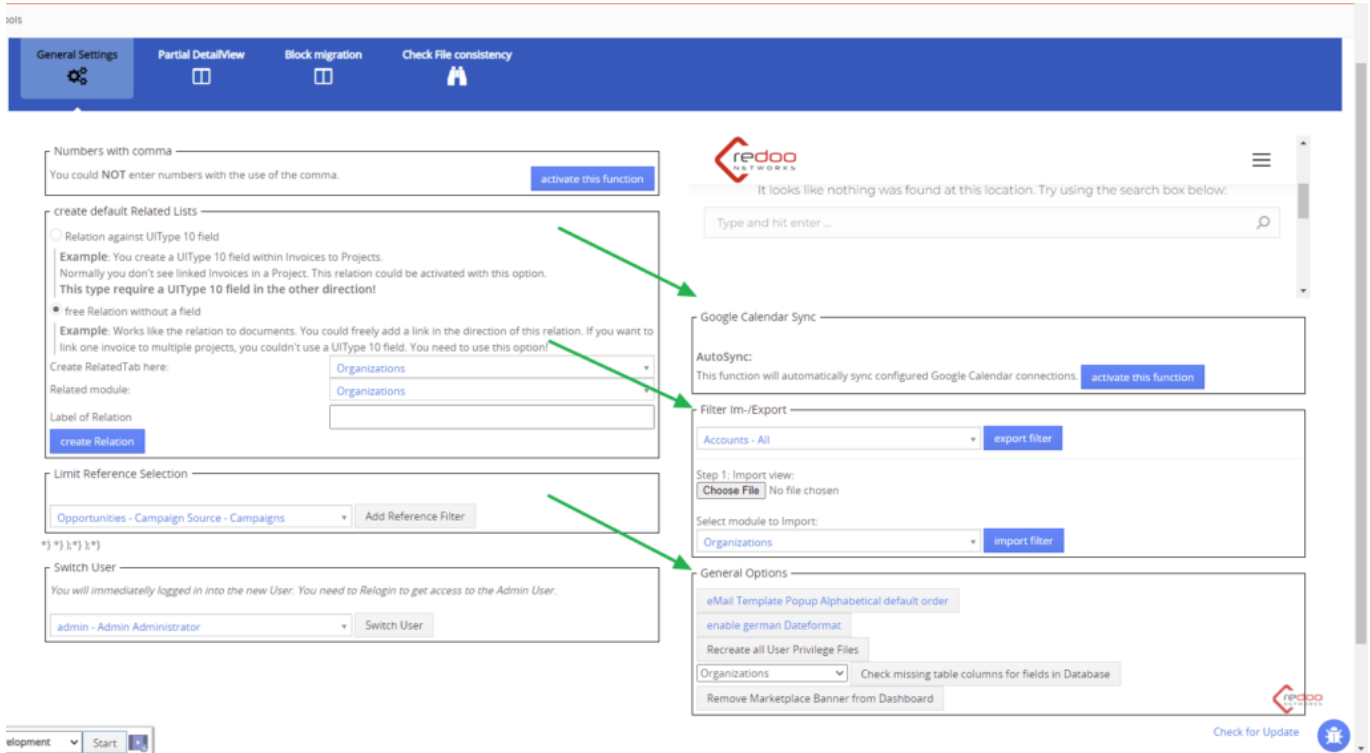

General Settings

The screenshot displays the 'Redoo Networks VtigerCRM Tools' interface. The left sidebar contains a navigation menu with 'Vtiger Tools' selected. The main content area is divided into several sections:

- Numbers with comma:** A panel with a sub-header 'Numbers with comma' and a description: 'You could NOT enter numbers with the use of the comma.' It includes an 'activate this function' button.
- create default Related Lists:** A panel with a sub-header 'create default Related Lists' and two options: 'Relation against UIType 10 field' and 'free Relation without a field'. It includes a 'create Relation' button.
- Limit Reference Selection:** A panel with a sub-header 'Limit Reference Selection' and a dropdown menu showing 'Opportunities - Campaign Source - Campaigns'. It includes an 'Add Reference Filter' button.
- Switch User:** A panel with a sub-header 'Switch User' and a dropdown menu showing 'admin - Admin Administrator'. It includes a 'Switch User' button.
- Google Calendar Sync:** A panel with a sub-header 'Google Calendar Sync' and an 'AutoSync' section with an 'activate this function' button.
- Filter Import/Export:** A panel with a sub-header 'Filter Import/Export' and an 'Accounts - All' dropdown menu. It includes an 'import filter' button.
- General Options:** A panel with a sub-header 'General Options' and several checkboxes and dropdown menus, including 'enable german Dateformat' and 'Recreate all User Privilege Files'.

- **Numbers with coma** - here you can activate a possibility to use number values with coma instead of dot
- **create default Related Lists** - Here you can set a relation against UIType 10 field or set a free Relation without a field
- **Limit Reference Selection** - A tool to add an additional reference selection within specific module fields
- **Switch User** - A special tool which can be used by admin to log in as any user registered in the CRM without password.

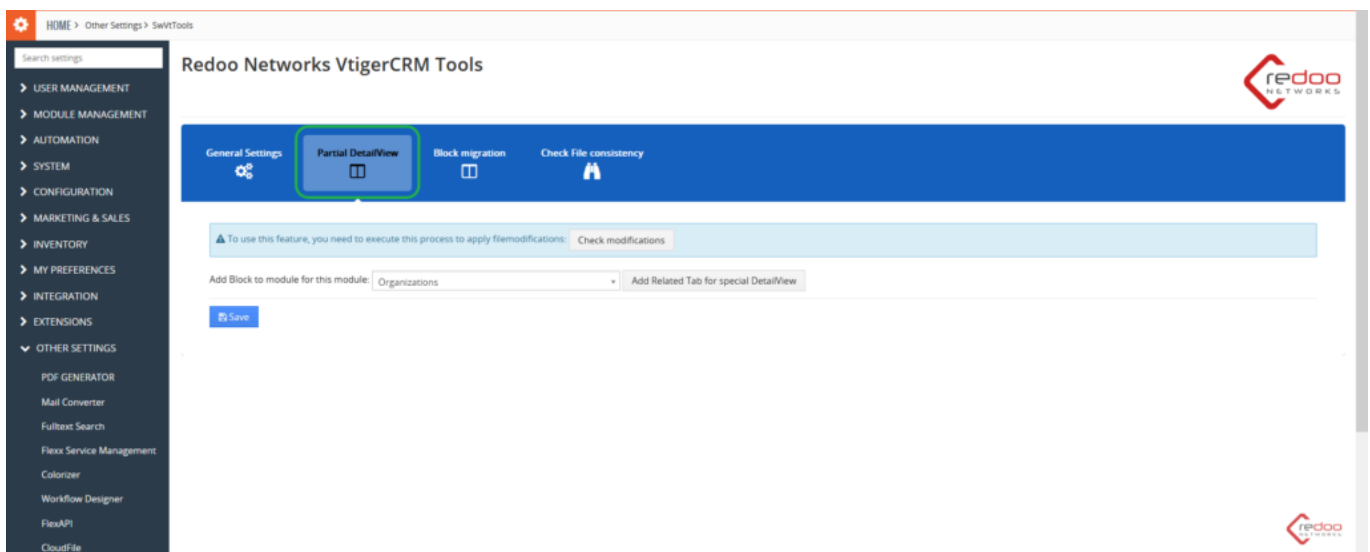

Second column brings some more features:

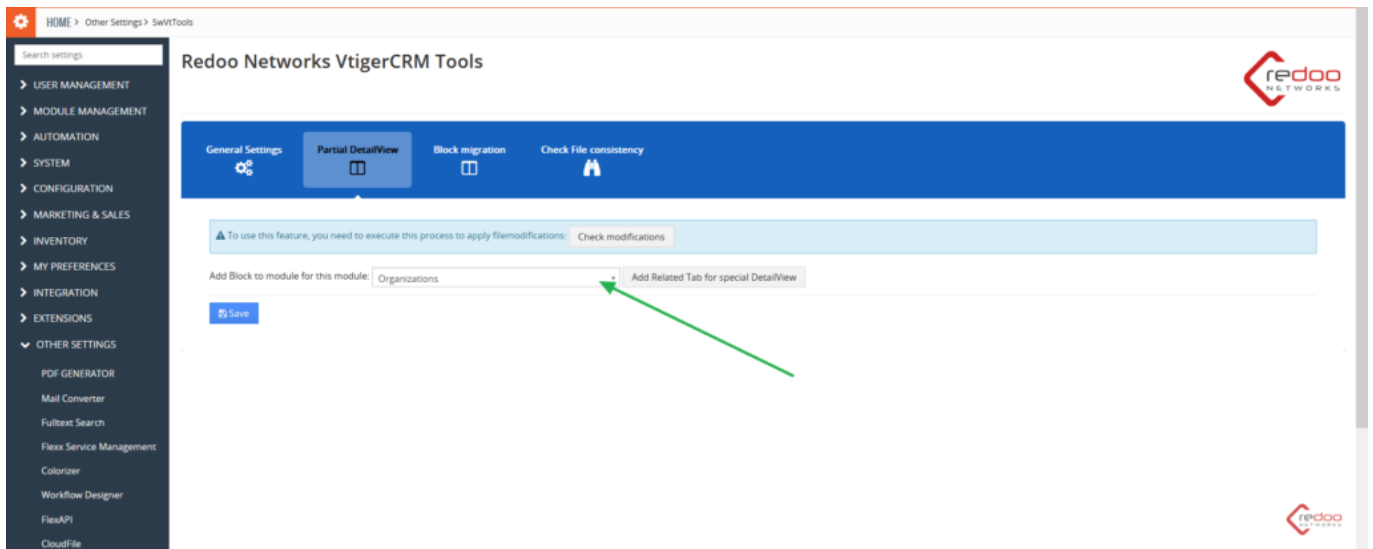

- **Google Calendar Sync** - This function will automatically sync configured Google Calendar connections
- **Filter Im-/Export** - Here you can import or export a filter for a specific module
- **General Options** - this block is used for some more specific options

Partial DataView

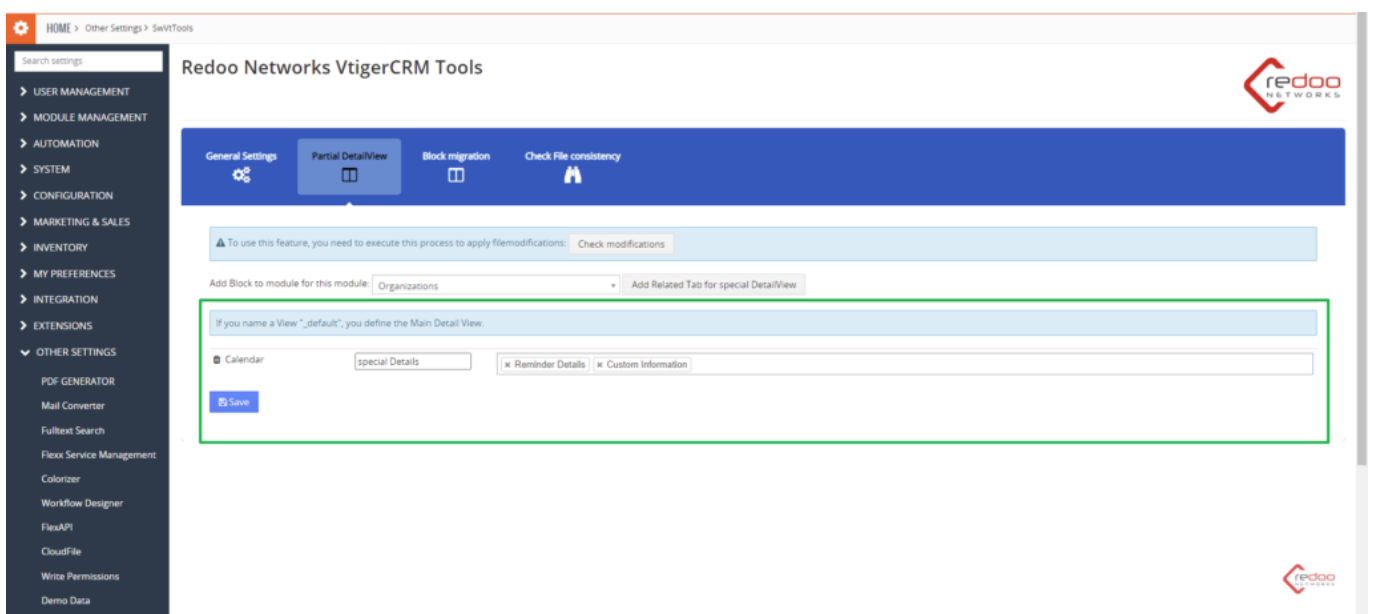

Here you can create a related tab block for any module of the CRM

Select a module in the list here

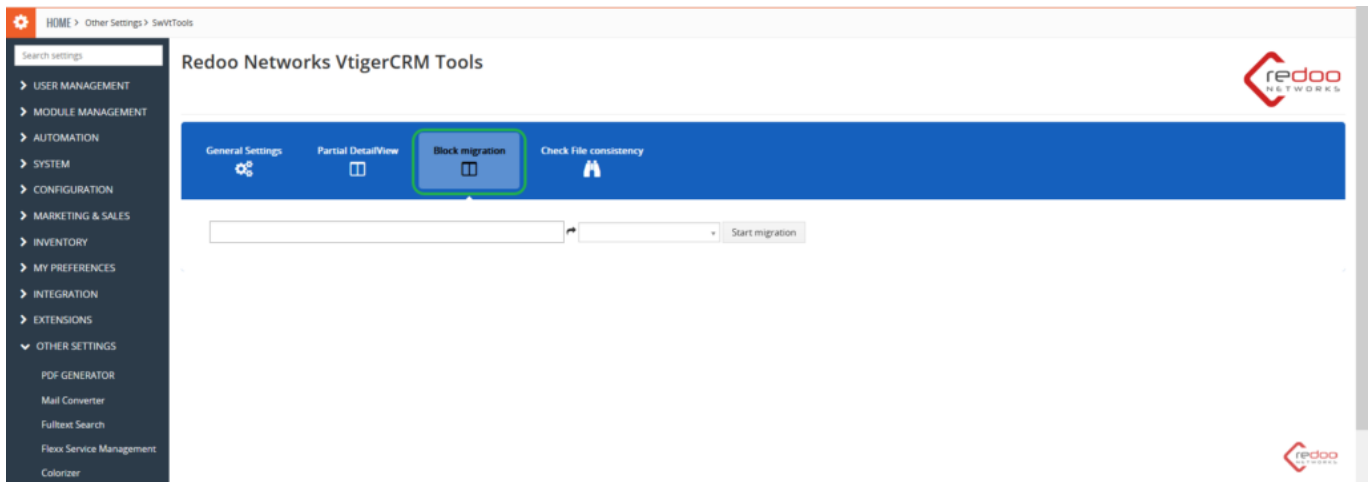

In the block appeared you customize the type of a tab and its filling

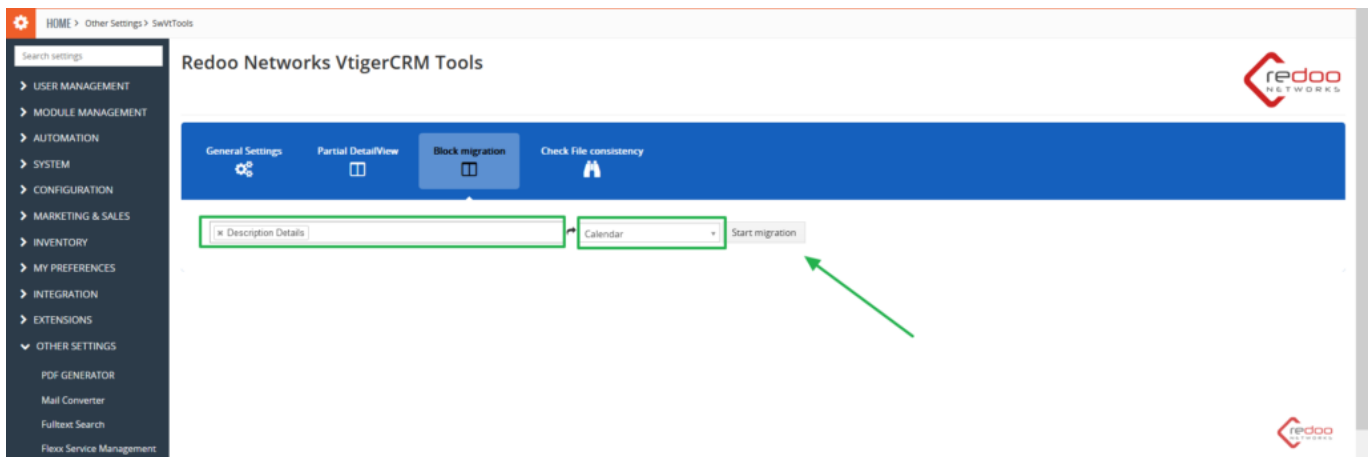

Block migration

In Block migration you can make a migration between two blocks

To do that firstly select a block and a Module where you can perform a migration and then press "Start migration" button

In **Check File consistency** you can check if the all internal files are present in the CRM and if not find a cause of the problem you are struggling with

HOME > Other Settings > SevTools
