

Flexx.Suite

4.Records in CRM

This is the instruction on how to add records in Flex Suite

In this example we will show how to add an Organization

To add new record press the "Add Record" button in the top right corner like shown in the image

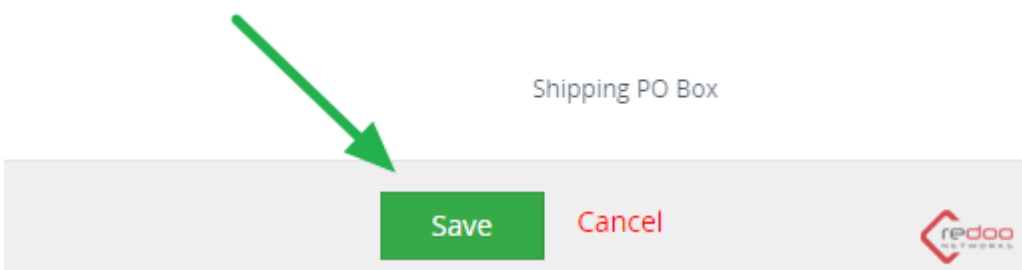

You can enter all useful information in this form

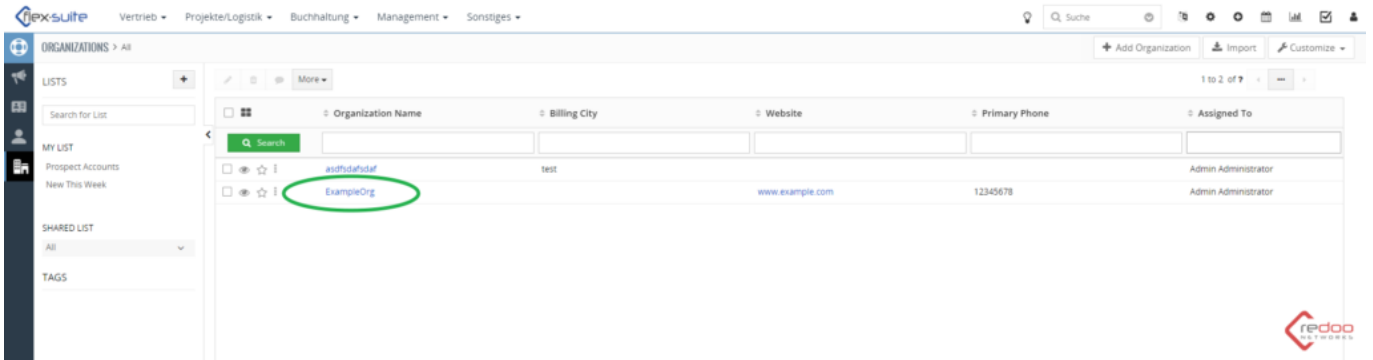

In the upper area you enter the general information and in fields below you can add additional data.

Fields with red stars are obligatory

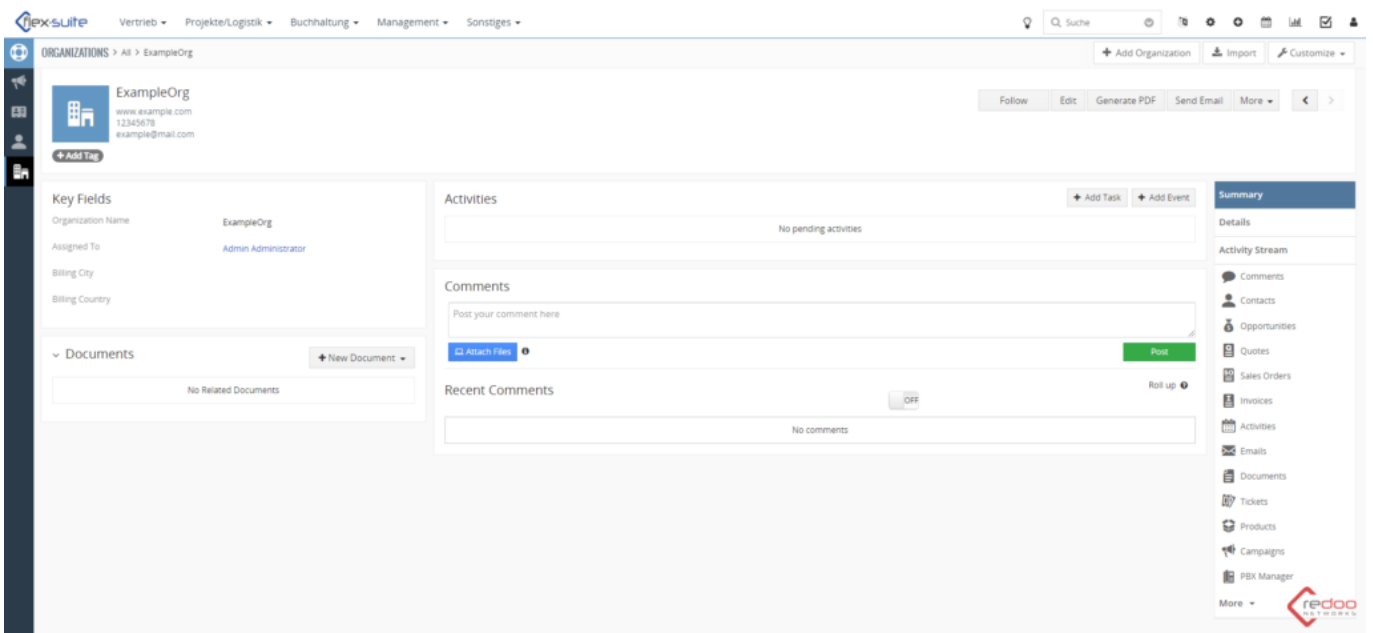

When you finish press the Save button below to

When the Records is saved you can see it listed with other records

When you open a record you will see this Summary page

Here you can see the list of basic information about the record:

- Key Fields
- Documents
- Activities
- Comments
