Creation of a new Standort state

Copyright © 2022 Redoo Networks GmbH

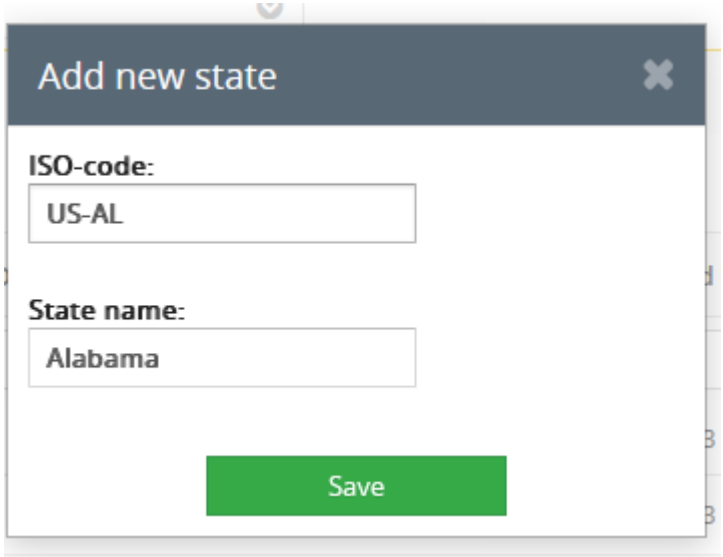

If you want to use locations outside of Germany, you have to add a new picklist value for the `State` field in Standort module. You can not do it with Vtiger's `Edit picklist values`, because it does not allow creating values with `[` symbols, which should be used for this value.

In order to create a new state, follow the next steps:

- 1) Make sure you a logged in with an admin user. Only admin users can add new Standort locations
- 2) Go to List/Detail View of Standort module, and press on the 'Add new state` button:

- 3) In the modal, fill the fields like in the example, and press save:

After, create a new Standort record with you location
