

Playground

10. Inspections

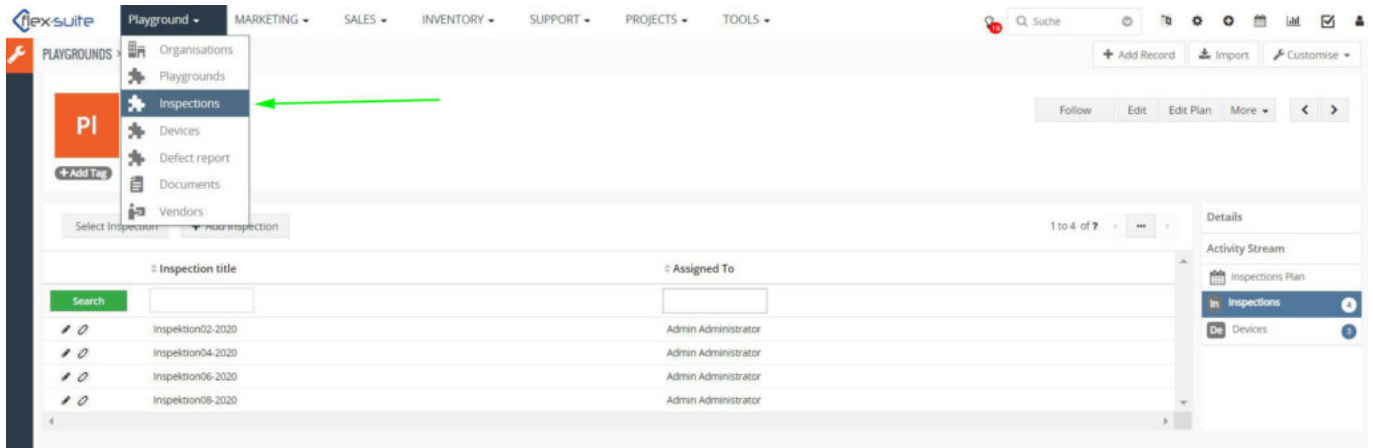

To see the list of inspections already stored on the playground, simply press the “Inspections” button (→ green arrow) on the right menu page on the corresponding playground.

Here you can view all previously performed inspections. You can also store the date that the inspector specified during his inspection.

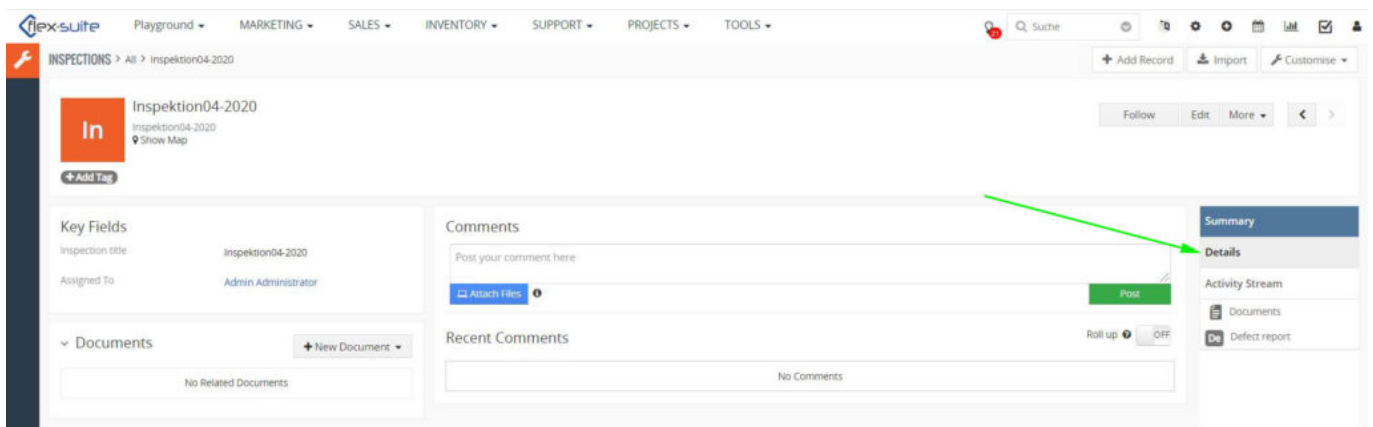

You can also view the list of all inspections by clicking the “Inspections” button in the drop-down menu. (→ green arrow)

When you click on the inspection, you will see the page with some basic information about the inspection.

After that, click the “Details” button (→ green arrow) and get all the important information.

On the inspection page you can view the summary, the details, the activity overview and the reports of the inspections.

To do so, always click on the corresponding button in the right menu page. (→ green arrow)

The screenshot shows the 'flexsuite' application interface for 'INSPECTIONS'. The top navigation bar includes 'Playground', 'MARKETING', 'SALES', 'INVENTORY', 'SUPPORT', 'PROJECTS', and 'TOOLS'. A search bar with 'Suche' is on the right. The main content area displays 'Inspektion02-2020' with a sub-entry 'Inspektion02-2020' and a 'Show Map' link. Below this is a table with two columns: 'Device Reviews Title' and 'Assigned To'. The table contains one row with the value 'Device Defect Report 1' and 'Admin Administrator'. To the right of the table is a sidebar with a 'Summary' section containing 'Details', 'Activity Stream', and 'Documents'. The 'Documents' section is expanded, showing a document titled 'De: Defect report' with a blue icon and a notification bubble. A green arrow points from the table area towards the 'Defect report' document in the sidebar.
