

Playground

7. Add Device

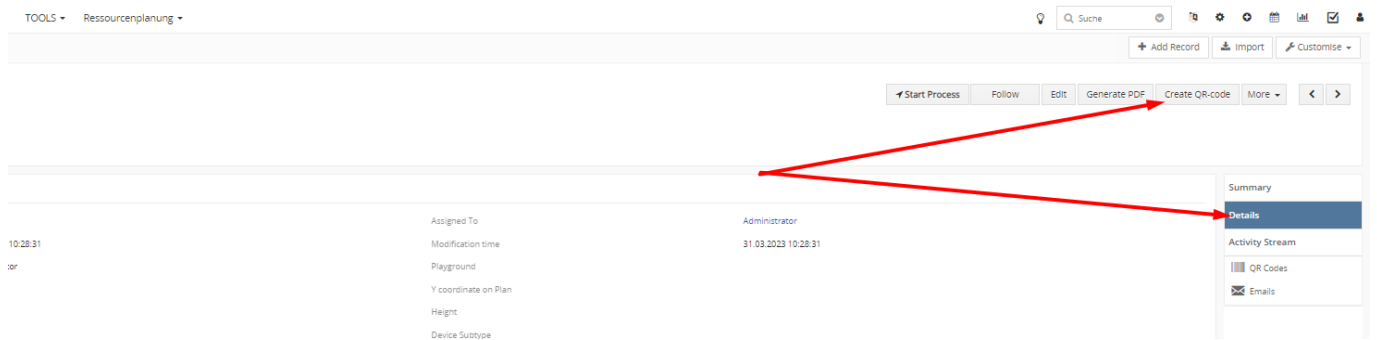

To add a new device click on the button "Create Device" (→ green arrow).

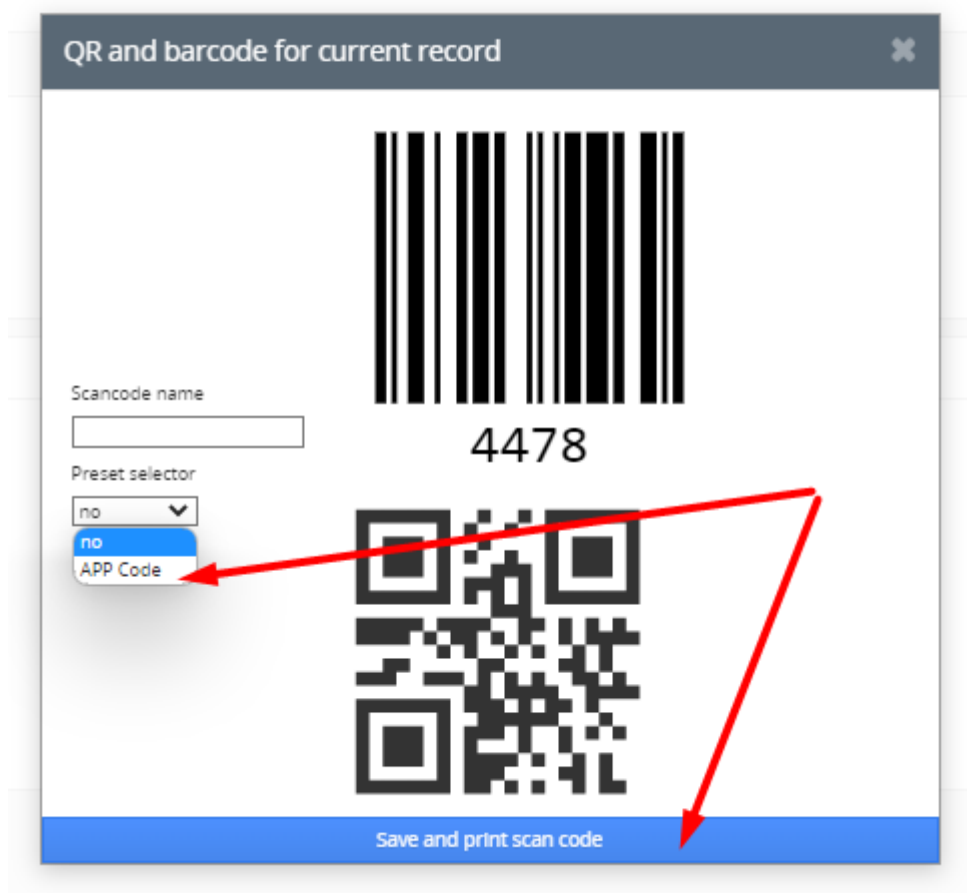

In the opened menu you can enter all information to the device name, type and category. Always confirm your entries with "Save" (→ green arrow).

A QR code must be generated for each device after it has been created. To do this, switch to the detailed view of the created device.

For your application to recognize the QR code, make the following selection

You can also print and save the generated code.
