

1. Using shotcodes in a PDF generator

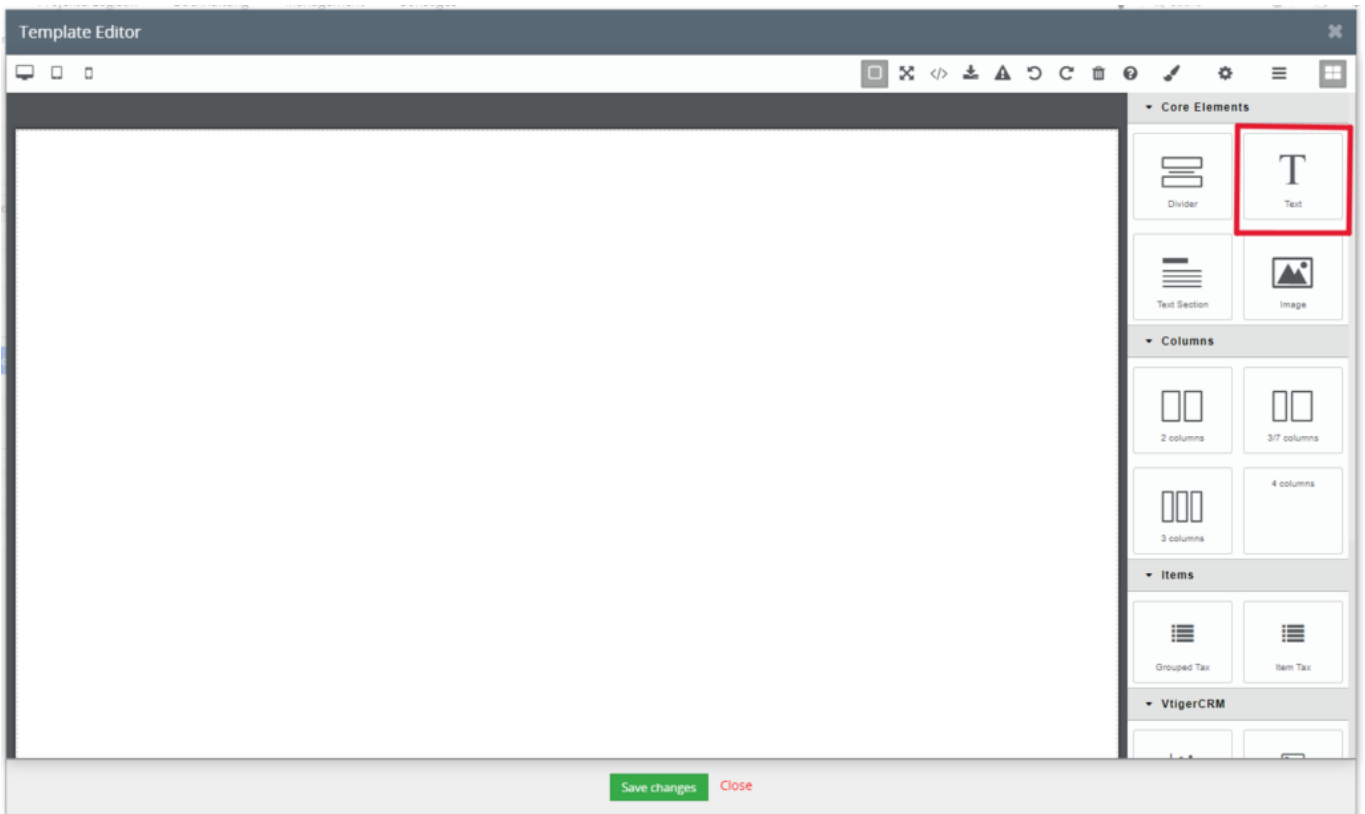

To use shotcodes in PDF templates, open the template settings area.

Header			
Main Header	edit Header Template	Usage	<input type="text" value="on first page"/>
Additional Header	edit additional Header Template	Usage	<input type="text" value="disabled"/>

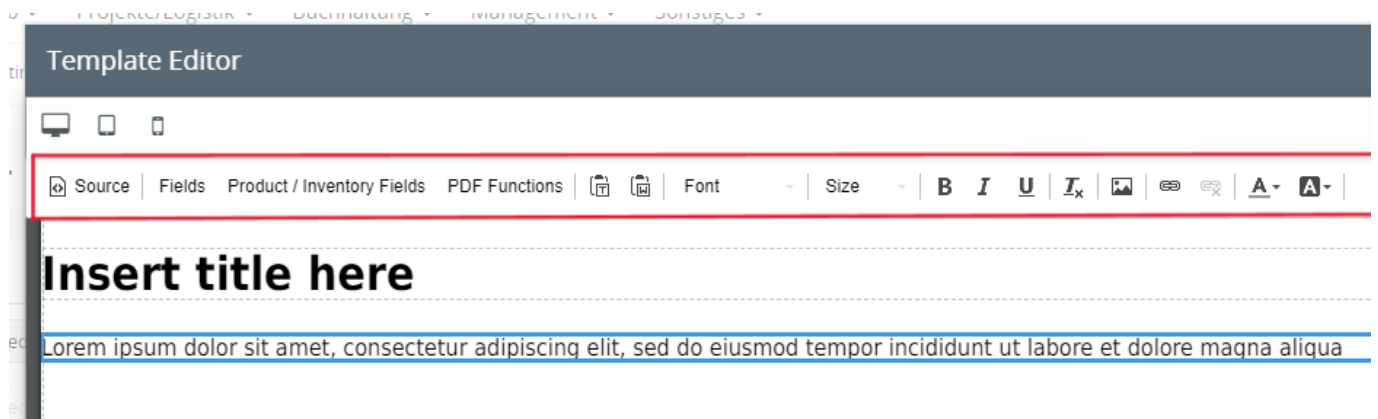

Template	
PDF Template	edit PDF Template

Footer			
Main Footer	edit Footer Template	Usage	<input type="text" value="disabled"/>
Additional Footer	edit additional Footer Template	Usage	<input type="text" value="disabled"/>

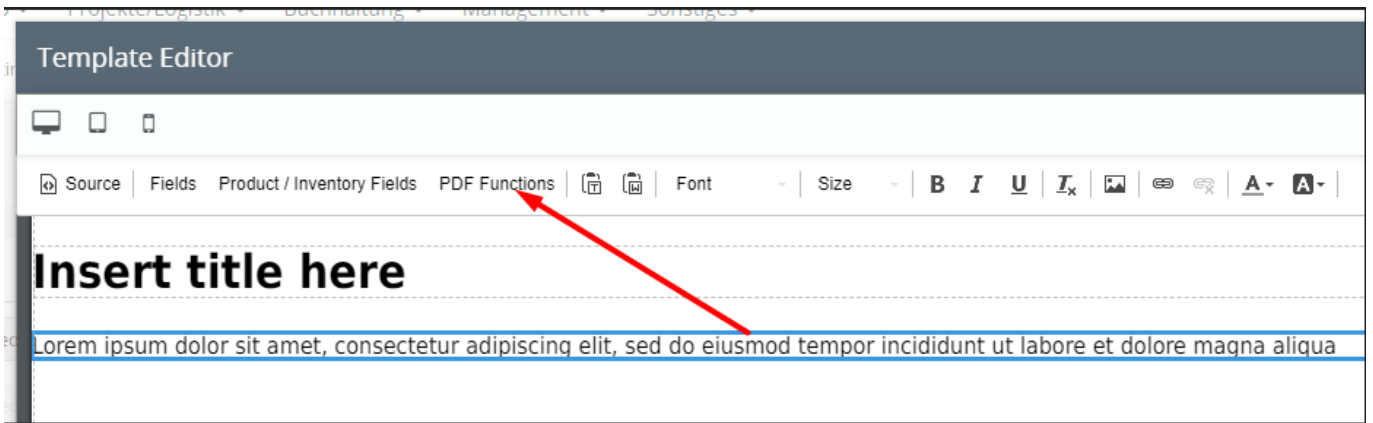

Next, add a text block to the template

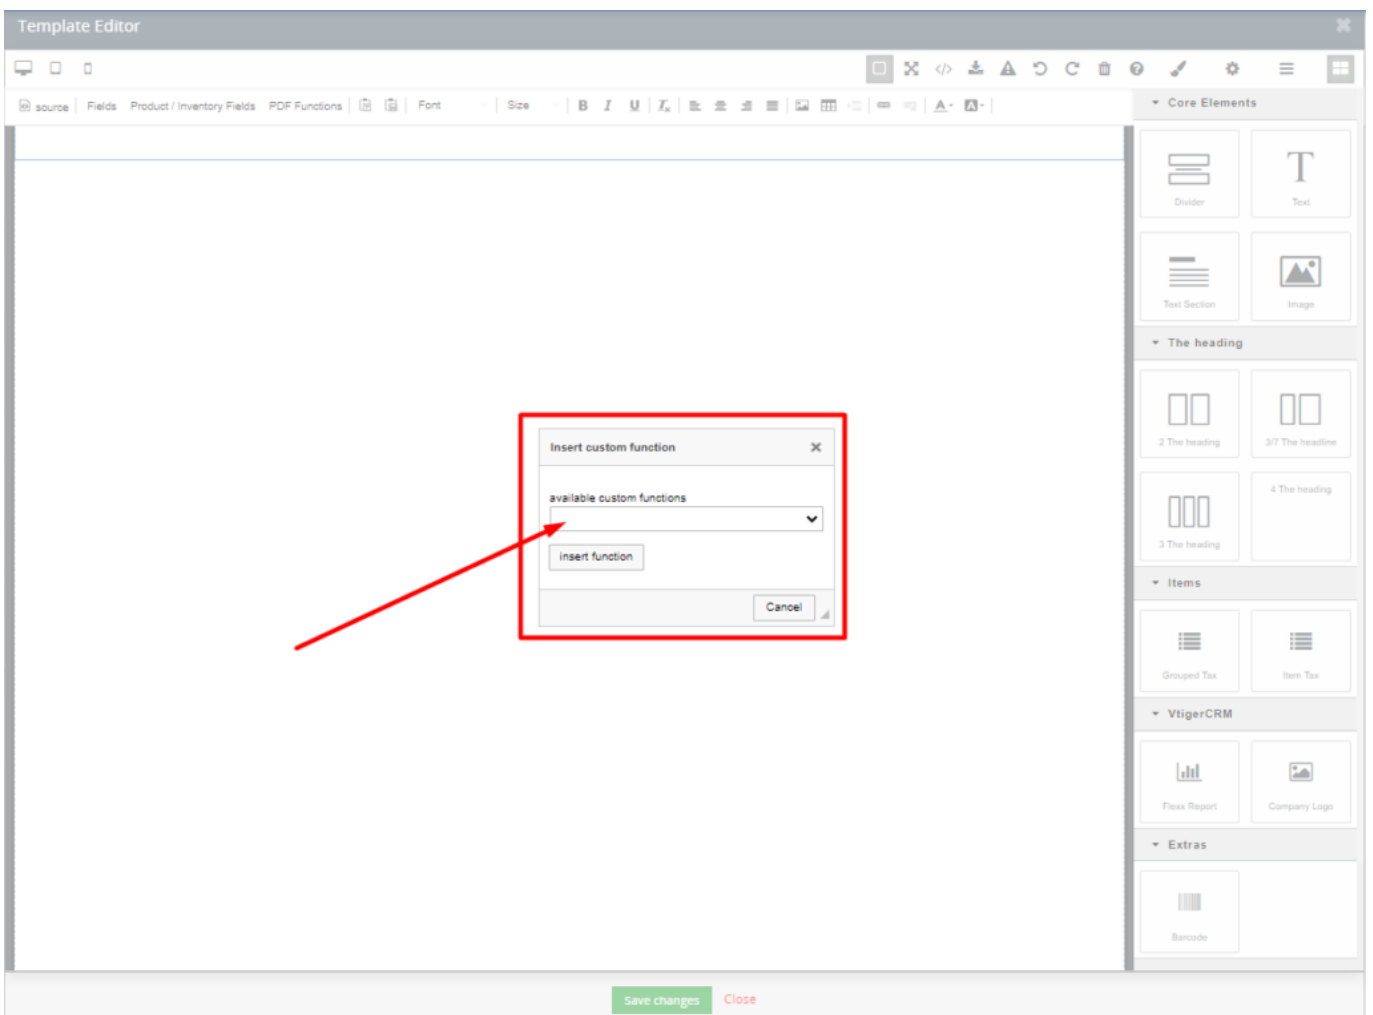

After you add this element, the following editing window appears

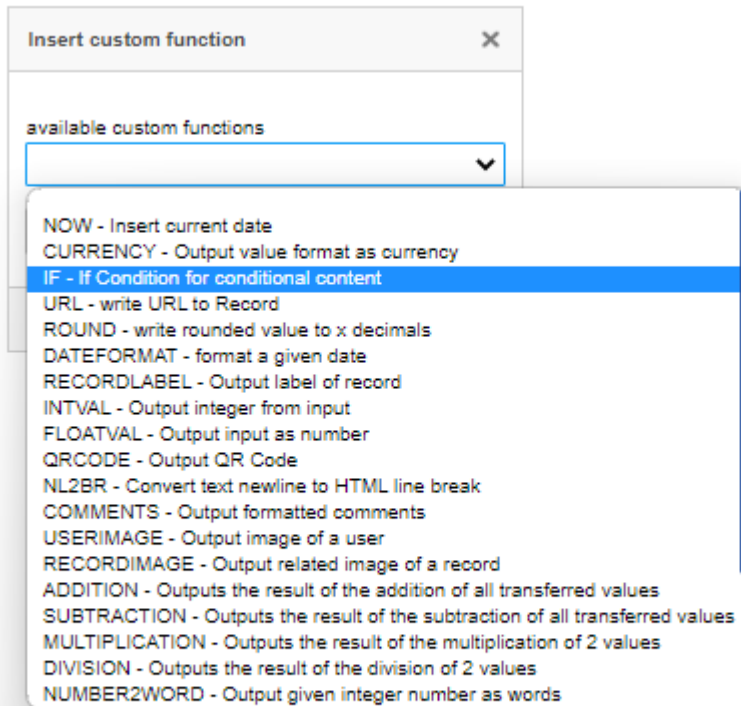

In diesem Panel klicken Sie auf den folgenden Button: «PDF Funktionen»

After pressing this button a window will open with the possibility to select a shortcode

Below you will find a more detailed description of each shortcode.
