

3. task settings

To add a new field with task details, click here

The screenshot shows a window titled "Project Task 1" with a close button (X) in the top right corner. On the left side, there is a blue button labeled "Add Field" with a red arrow pointing to it. Below this button, there are several configuration options: "related to" with a dropdown menu set to "No relationship", "Labelsource open Task" with a dropdown menu set to "Status", "Labelsource finished Task" with a dropdown menu set to "Description", and "Due date x days after related Task" with an empty text input field. Below these options, there is a section titled "Which fields, the user needs to fill, during finishing this task" with a dropdown menu set to "Description". At the bottom right of the window, there is a blue button labeled "Add Task".

To create a new task, click here

The screenshot shows the same "Project Task 1" window. The "Add Field" button is now highlighted with a blue background. Below it, there are two field configuration rows. The first row has a dropdown menu set to "Description", a dropdown menu set to "Text", and a large text input field. The second row has a dropdown menu set to "ID", a dropdown menu set to "Text", and a dropdown menu set to "-TXT_CHOOSE_VALID_FIELD-". Below these rows, the "related to" dropdown is set to "No relationship", "Labelsource open Task" is set to "Status", "Labelsource finished Task" is set to "Description", and "Due date x days after related Task" is an empty text input field. The "Which fields, the user needs to fill, during finishing this task" dropdown is set to "Description". At the bottom right, the "Add Task" button is highlighted with a blue background and a red arrow pointing to it.

In the task you can choose

- depending on
- Field value for display open task

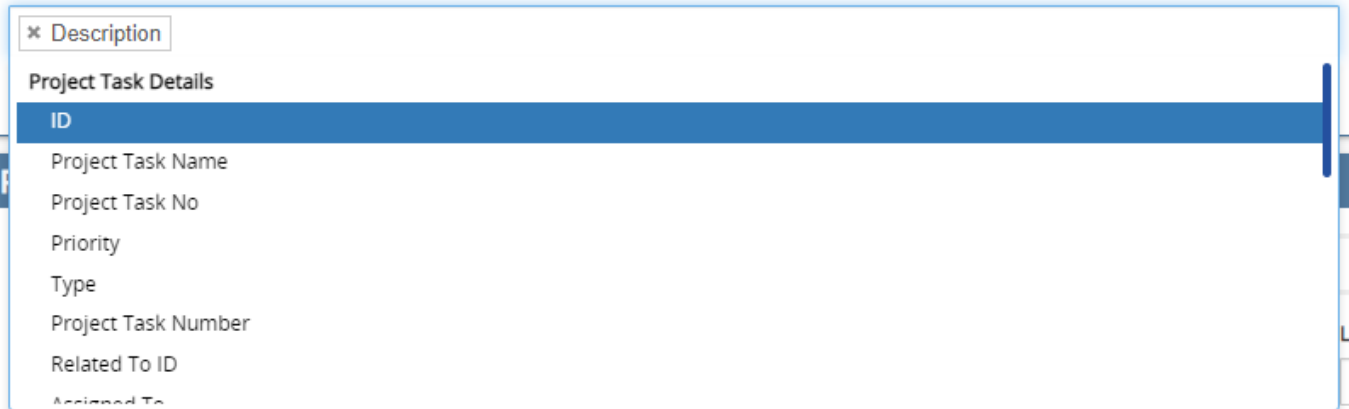

The image shows two configuration panels for 'Project Task 1' and 'Project Task 2'. In the 'Project Task 1' panel, a dropdown menu is open, displaying a list of fields under 'Project Task Details'. The 'Project Task No' option is highlighted in blue. The 'related to' dropdown is set to 'No relationship', and the 'Which fields, the user needs to fill, during finishing this task' section has 'Description' checked. The 'Project Task 2' panel below it has similar settings.

Field value for View completed task by dependent task

This screenshot is similar to the one above, showing the configuration for 'Project Task 1' and 'Project Task 2'. The dropdown menu is open, and the 'Project Task No' option is highlighted. The 'related to' dropdown is set to 'No relationship', and the 'Which fields, the user needs to fill, during finishing this task' section has 'Description' checked.

- Completion date x days after dependent task
- Which fields should be set upon completion

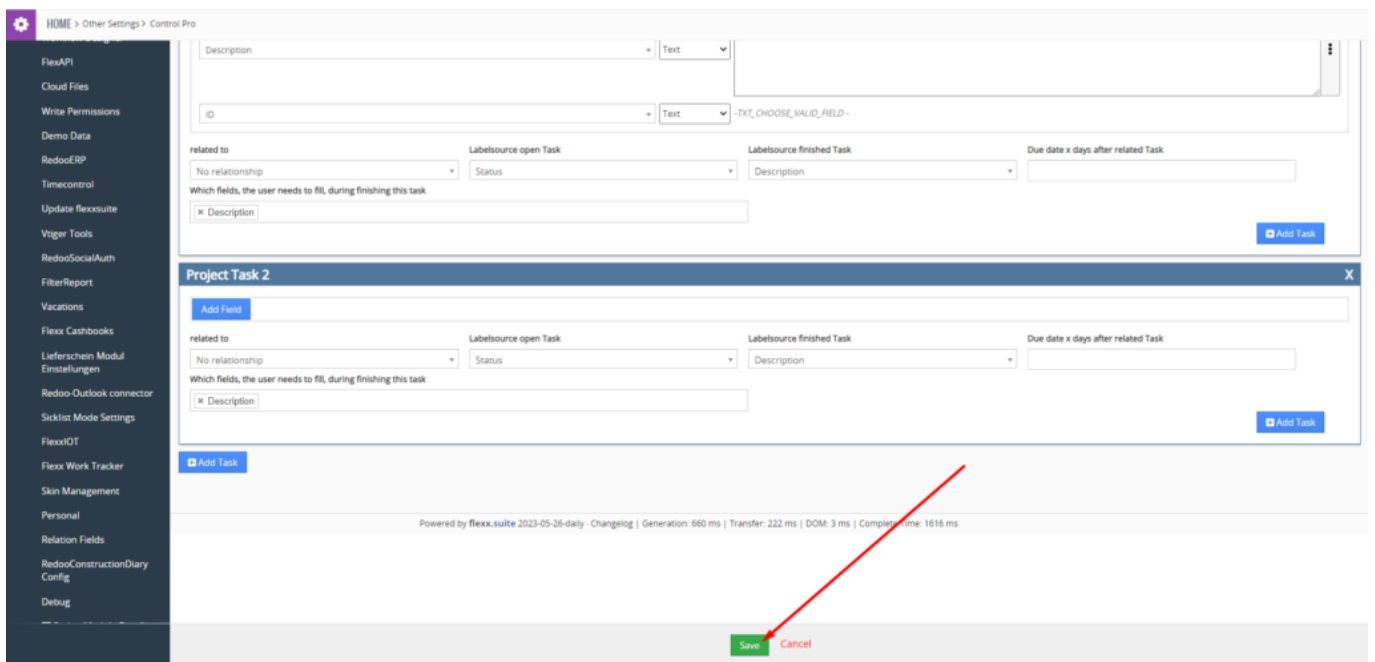

Which fields, the user needs to fill, during finishing this task

Which fields, the user needs to fill, during finishing this task

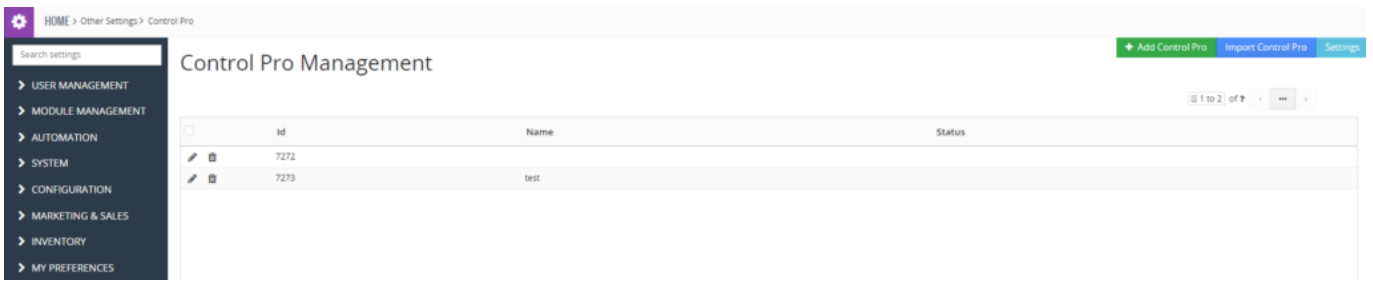

You can also change the order of tasks by simply sliding one task over the other

Click here to save

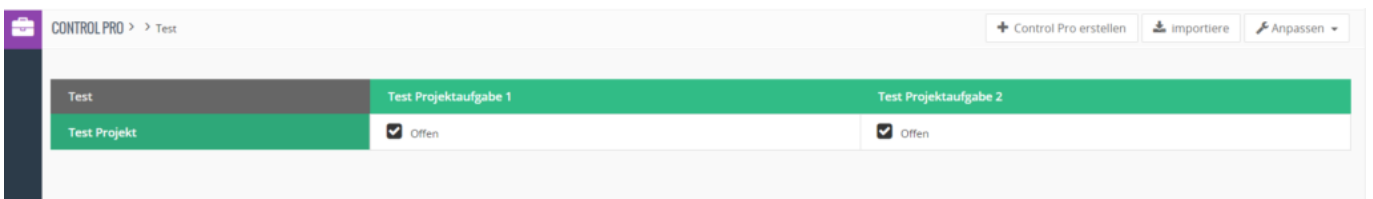

After that you will see a list view of the records

Important! The condition created in Control Pro is applied only to the projects created after it.

If you click on it, you can see the tasks of this project and their status

Wenn Sie darauf klicken, können Sie die Aufgaben dieses Projekts und ihren Status sehen
