

5. "ROUND - Write the rounded value to x decimal places".

This shortcode is used for rounding values

The shortcode can be used in all modules in which number fields (number value fields) are displayed

Meaning of the expressions in the shortcode:

The value to round

```
[$[ROUND,value,decimals]
```

Die Anzahl der Zeichen, die nach der Rundung angezeigt werden

```
$(ROUND,value decimals)
```

Beispiel für die Verwendung:

```
$(ROUND,3.1415926535,2)
```
