

Workflow Designer

Task Management

Copyright © 2022 Redoo Networks GmbH

The actions are managed over a repository based system, where you get updates without to update the complete module.

You reach this site over Workflow Designer Settings Sidebar by click on “Task Management” (1).

When you opened this page, you see a list of all available actions. You get the last update, by click on “update repositories” (2).

Whenever there are new actions or already published special actions, there will be an “install” button to install these action.
When there is an update, you see an “update” button.

The latest updates are also automatically installed, when you update the complete module.
